

# RAINWATER TO DRINKING WATER-F5

INNOVATIVE & SUSTAINABLE WATER SOLUTIONS YOU CAN TRUST

The One Eight F5 Filtration System completely eradicates all harmful bacteria and pathogens from rainwater. Our technologically advanced, energy-efficient systems operate to produce an environmentally sustainable and chemical-free supply of pure, clean, safe water, whilst maintaining full 24/7/365 accountability, reporting and traceability on the water quantity, quality and status, thus giving our clients full control of their supply and return on Investment.

Using our patented technology to convert the rainwater from your roof space for use within your commercial building will give you an immediate saving on water charges, reduce water demand and become a more sustainable business.

## KEY BENEFITS : F5-RAINWATER FILTRATION SYSTEM

- Proven and Trusted technology ensures 100% microbiologically safe water
- Water can be sourced from One Eight Rainwater recovery systems
- The F5 is the only chemical-free water purification system available which removes ALL pathogenic organisms from your water supply.
- Immediate reduction on Water Bills, ROI of sub 3 years
- Full Cloudbased monitoring and control 24/7/365
- Fully autonomous operation.
- Full water Quality, Quantity and System Status reporting providing full accountability
- Low annual running and maintenance
